

**CCO Advisory Councils
Report to the Governing Board
February 2017**

Community Advisory Committee (CAC)

The Community Advisory Council (CAC) met at Trillium Behavioral Health on Monday, February 27. There were several issues in our transition to the new meeting place. The food was late, due to it being delivered to the wrong location. One member had significant challenges getting to the meeting and we will arrange for her to take RideSource from now on. Several members mistakenly went to the old location (despite receiving directions and reminders.) The March meeting should be much smoother.

Debi Farr gave the Trillium report. She distributed a Trillium fact sheet that is used when meeting with legislators. There was a discussion regarding the budget shortfall.

Rick Kincade gave the CAP update. They are reviewing their charter. They are developing a medical team management and pain management education plan for consumers, providers, and the communities. They will bring the plan back to CAC for review.

Dr. Thomas Wuest gave a presentation on Trillium Quality Measures. He discussed the various rating standards as well as highlighting that Trillium is the only CCO to have received NCOA status.

Jennifer Webster gave an update about Project Plunge, the summer swimming program for Trillium families. Project Plunge 2.0 is a pilot that was created to promote physical activity for 9 – 14 year olds in the summer. The Lane County Public Health's Prevention Division is working with Eugene Parks and Recreation on this project. Eugene Parks and Rec have their marketing department on board to advertise the Echo Hollow Pool passes (10 visit passes for \$5.00) to their neighborhood families. Money for the pilot will be funded by left over funds from the Project Plunge 2016.
